We advise and explain thoroughly

“Due to electrical accidents, each year millions of people are injured, lives lost and property damaged. Simply as a result of the place they called home having an electrical hazard that they most likely had no idea existed. Things such as outdated wiring and components, poor installation and electrical systems not being maintained. Christopher John Electrical knows the value of life and we have worked for over 10 years helping people to protect their families and belongings from such accidents.

Technology is changing rapidly and along with that comes the need to constantly change the electrical industry. With all the new changes, our homes are able to be safer and energy use is more efficient. With these many advancements in the technology and the new appliances available, the electrical codes are also being updated frequently. If your home’s electrical

system isn't being updated as well then you are at risk for a potential hazard. According to the U.S. Fire Administration from 1992 to 2001, electrical problems accounted for 407,606 fires, 3,406 deaths and \$7,858,700,000 in damages to homes and property in the United States.

C.J.E. can help to educate you and improve the safety standard of your home with our Home Protection Plans. Many disasters can be avoided simply by having regular maintenance. This would be a great opportunity to protect your family and your home from electrical shock or possibly something worse.”

Here are a few questions to help determine if your home’s electrical system needs attention to protect your family and investment....

*Your Neighborhood Electrician
Christopher J. Paccione
Founder and CEO*

	Yes	No
Are you the original owner of your home?	<input type="checkbox"/>	<input type="checkbox"/>
Is your home more then 40 years old?	<input type="checkbox"/>	<input type="checkbox"/>
Do the lights dim or flicker?	<input type="checkbox"/>	<input type="checkbox"/>
Do the circuit breakers trip often?	<input type="checkbox"/>	<input type="checkbox"/>
Do fuses blow often?	<input type="checkbox"/>	<input type="checkbox"/>
Do you have extension cords or multiple power Strips in permanent use?	<input type="checkbox"/>	<input type="checkbox"/>
Have you added onto your home or done renovations?	<input type="checkbox"/>	<input type="checkbox"/>
Have you added any new appliances to your home?	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	<input type="checkbox"/>

If you answered “yes” to any of the above questions, then it is highly recommended that you have electrical system maintenance performed on your home.

Dear Friend,

At Christopher John Electrical, we are always striving to find new ways to give our customers friendly, professional and exceptional service.

This means always making sure that you are notified and educated of any potential electrical hazards, how to correct them and most importantly how to prevent anything else from becoming a catastrophe that could harm you, your family and your investments.

With keeping this in mind and taking in account all the information provided in this booklet, we strongly recommend that you enroll into one of the Home Protection Plans that C.J.E. has designed. Let us find and fix the problems so you don't have to worry.

Thank you for choosing our electrical team for your electrical service needs. We are looking forward to protecting your home and servicing you in the future.

Sincerely,

Christopher John Electrical, Inc.
